EDITORIAL

Hypertension: The Evolution of a Scientific Journal
Edgar Haber, Victor J. Dzau, Robert M. Graham, Randall M. Zusman ____ 1

LABORATORY STUDIES

Human Chromogranin A: Purification and Characterization from Catecholamine Storage Vesicles of Human Pheochromocytoma
Daniel T. O'Connor, Ronald P. Frigon, Roger L. Sokoloff ____ 2

Acute Local Effects of Angiotensin II on the Intestinal Vasculature
Richard A. Nyhof, Terry G. Rascoe, Harris J. Granger ____ 13

Cadmium Effect on the Na, K-ATPase System in Cultured Vascular Smooth Muscle Cells
Aijiroh Tokushige, Hirohiko Higashino, Bernard M. Searle, Hirokazu Tamura, Minoru Kino, John D. Bogden, Abraham Aviv ____ 20

Distributions of Microvascular Pressure in Skeletal Muscle of One-Kidney, One Clip, Two-Kidney, One Clip, and Deoxycorticosterone-Salt Hypertensive Rats
Gerald A. Meininger, Patrick D. Harris, Irving G. Joshua ____ 27

Role of the Renin-Angiotensin System in the Control of Vasopressin and ACTH Secretion during the Development of Renal Hypertension in Dogs
Lillian K. Ben, Judy Maselli, Lanny C. Keil, Ian A. Reid ____ 35

Temperature Dependence and Bidirectional Cation Fluxes in Red Blood Cells from Spontaneously Hypertensive Rats
Alex L. Harris, Carl C. Guthe, Frida van't Veer, David F. Bohr ____ 42

Possible Role of Nutritional Factors in the Incidence of Cerebral Lesions in Stroke-Prone Spontaneously Hypertensive Rats
Yukio Yamori, Ryoichi Horie, Hisao Tanase, Keigo Fujiwara, Yasuo Nara, Walter Lovenberg ____ 49

Ontogeny of Neural and Non-neural Contributions to Arterial Blood Pressure in Spontaneously Hypertensive Rats
Peter G. Smith, Carol Wall Poston, Elliott Mills ____ 54

Progressive Microvascular Alterations with the Development of Renovascular Hypertension
Irving G. Joshua, David L. Wiegman, Patrick D. Harris, Frederick N. Miller ____ 61

Effects of Graded Renal Artery Constriction on Blood Pressure, Renal Artery Pressure, and Plasma Renin Activity in Goldblatt Hypertension
William R. Murphy, Thomas G. Coleman, Thomas L. Smith, Karen A. Stanek ____ 68

CLINICAL STUDIES

Primary Hyperaldosteronism in Childhood due to Unilateral Macronodular Hyperplasia: Case Report
Sharon E. Oberfield, Lenore S. Levine, Adolfo Firpo, David Lawrence, Elizabeth Stoner, Donna Jean Levy, Subha Sen, Maria I. New ____ 75

Concurrent Validity Studies of Blood Pressure Instrumentation: The Philadelphia Blood Pressure Project
William F. Barker, Mary L. Hediger, Solomon H. Katz, Evelyn J. Bowers ____ 85

Converting-Enzyme Inhibition Corrects the Altered Adrenal Response to Angiotensin II in Essential Hypertension
Terry Taylor, Thomas J. Moore, Norman K. Hollenberg, Gordon H. Williams ____ 92

5-HT, Alpha-Adrenoceptors, and Blood Pressure: Effects of Ketanserin in Essential Hypertension and Autonomic Insufficiency
Gert T. Wenting, Arend J. J. Woittiez, Arie J. Man in't Veld, Maarten A. D. H. Schalekamp ____ 100

Ambulatory Blood Pressure Recordings: Reproducibility and Unpredictability
Bertrand Jacot des Combes, Marinette Porchet, Bernard Waeber, Hans R. Brunner ____ 110

Racial Differences in Erythrocyte Cation Transport
Alan B. Weder, Barbara A. Torretti, Stevo Julius ____ 115

Alcohol Consumption as a Risk Factor for High Blood Pressure: Munich Blood Pressure Study
Victoria Cairns, Ulrich Keil, David Kleinbaum, Angela Doering, Jutta Steiber ____ 124

LETTERS TO THE EDITOR ____ 132

Hypertension

Instructions to Contributors

Original Contributions

Manuscripts reporting original research, Rapid Communications, Case Reports, Brief Reviews, and Letters to the Editor are considered for publication on the condition that they are contributed solely to *Hypertension*.

Manuscripts should be submitted to:

Edgar Haber, M.D.
Editor-in-Chief, *Hypertension*
Charles River Park
7 Whittier Place, Suite 106
Boston, Massachusetts 02114

All manuscripts must be accompanied by a letter containing the following statement: "I (we) the undersigned author(s) hereby transfer, assign, or otherwise convey all copyright ownership of my (our) article "_____" to the American Heart Association if this article is published in *Hypertension*."

Manuscripts

Manuscripts must be submitted in triplicate. Manuscripts, including tables and figures, should be complete upon submission. Manuscripts should be typewritten on good quality nonerasable paper, one side of the page only, with double spacing, and with liberal margins on all four sides.

The title page should include: author(s) name(s), degree(s), and hospital and academic affiliation(s); address for mailing proofs; short title to be used as running head; and from three to eight key words not used in the title. The title should be informative of the manuscript's contents and should not exceed 83 characters, including spaces. References, figure legends, tables, and figures follow the text respectively. Page numbering begins with the title page, follows with the summary (abstract) on page 2, and so forth.

The Council of Biology Editors Style Manual, 5th ed., 1983, should be followed for abbreviations (American Institute of Biological Sciences, 3900 Wisconsin NW, Washington, D.C. 20016). Abbreviations should be defined on first appearance in the summary, text, tables, and figures. Generic names of drugs should be given.

Summary (Abstract)

The summary begins each article. It should be concise (not more than 250 words), informative, and suitable for use by abstracting services.

References

References should be typed double-spaced and should appear at the end of the article in numerical sequence. Style is based on the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals."

Authors are responsible for submitting references that are accurate and complete. All authors should be cited. References should be restricted to 30 citations if possible.

Personal communications and unpublished observations may not be included in the references, but may be inserted in the text in parentheses. If such a citation is from someone other than the authors, a letter should be submitted in which the direct quotation is given with the signature of the original author. Abstracts may be cited only if they are the sole source and must be identified in the references as "Abstract." When including manuscripts accepted but not yet published, designate the journal followed by "(in press)." Information from manuscripts submitted but not yet accepted should be cited in the text as "(unpublished observations)."

The following samples show this journal's reference style:

Standard Journal Article

You CH, Lee KY, Chey RY, Menguy R. Electrogastrographic study of patients with unexplained nausea and vomiting. Gastroenterology 1980;7:311–314

Journal Supplement

Mastri AR. Neuropathy of diabetic neurogenic bladder. Ann Intern Med 1980;92 (2 Pt 2):316–318

Frumin AM, Nussbaum J, Esposito M. Functional asplenia: demonstration of splenic activity by bone scan [Abstract]. Blood 1979;54 (suppl 1):26a

Book

Eisen HN. Immunology: an introduction to molecular and cellular principles of the immune response. 5th ed. New York: Harper and Row, 1974:406

Chapter in Book

Weinstein L, Swartz MN. Pathogenic properties of invading microorganisms. In: Sodeman WA Jr, Sodemen WA, eds. Pathologic physiology: mechanisms of disease. Philadelphia: WB Saunders, 1974:457–472

Published Proceedings Paper

DuPont B. Bone marrow transplantation in severe combined immunodeficiency with an unrelated MLC compatible donor. In: White HJ, Smith R, eds. Proceedings of the third annual meeting of the International Society for Experimental Hematology, 1974:44–46

Agency Publication

Ranofsky AL. Surgical operations in short-stay hospitals: United States—1975. Hyattsville, Maryland: National Center for Health Statistics, 1978; DHEW publication no. (PHS)78-1785. (Vital and health statistics; series 13; no 34)

Tables

Tables must be submitted in triplicate. Each table should be typed on a separate sheet of paper. Tables should be given an arabic number and a brief informative title. Horizontal rules should be drawn above and below the column headings and at the bottom of the table; elsewhere horizontal rules should be omitted and extra space used instead to delineate sections. No vertical rules should be used. Footnotes should be designated within the table and explained below in this order: *, †, ‡, §, ‖, ¶, **, ††, ...

Illustrations

Figures must be submitted in triplicate. Figure legends should be compiled in a separate list. Figures should be enclosed in separate envelopes and should not be mounted on cardboard. No clips should be used. The back of each figure should have an arabic number, name of author(s), and manuscript title. The top of the figure should be indicated. The editor, in some cases, will recommend reduction and/or cropping of illustrations, or deletion of unnecessary figures. Authors are responsible for the costs of color illustrations.

Figures should be reproducible as one-column-wide printed illustrations, if possible. Good glossy photographic prints should be submitted in sizes that have a close relationship to the width of one column of this journal (3⅛ inches). Original drawings should be prepared with black India ink and then photographed for submission. No typewriter or computer type should be used. The lettering should be of a size such that, when reduced, the height of the characters will be 1.5–1.75 mm (2.5–3.0 mm on halftones).

Rapid Communications

The Editors will consider manuscripts thought by the author(s) to be of unusual scientific value and importance for publication as a rapid communication. Papers submitted for consideration as a rapid communication must report original, complete, and definitive research of particular significance to the field and will be published approximately 2 months prior to longer manuscripts accepted on the same date. The Editors will make a decision on the acceptability of the manuscript within 2 weeks of its receipt. Manuscripts will be either accepted or rejected. Referees will critique manuscripts by phone. Galleys will not be sent for review by authors.

The covering letter accompanying the manuscript must request the manuscript be considered as a rapid communication. Such a manuscript must not exceed 10 double-spaced typewritten pages (including summary, text, references, tables, and figure legends). Any combination of 3 tables and/or figures is equivalent to one typewritten page.

Written reviewer's comments will ordinarily not be available. A paper rejected as a rapid communication may be resubmitted as a routine manuscript and will be considered on a de novo basis.

Case Reports

Case reports must add significant new information to clinical experience. Negative information should not be detailed. Case reports should be brief. Length should not exceed 12 double-spaced pages, including references. The review process to determine suitability for publication will be the same as that for research manuscripts.

Brief Reviews

In addition to reports of original research, *Hypertension* will publish Brief Reviews summarizing the present state of knowledge concerning a particular aspect of a special field. Brief reviews are generally solicited, but authors may send in titles and abstracts for consideration.

These reviews should be evenhanded and should cover the field selected thoroughly. The work of all relevant contributors should be cited.

The length should not exceed 24 double-spaced pages. The review process to determine suitability for publication will be the same as that for research manuscripts.

Reprints

Reprints of articles will be furnished to authors when ordered in advance of publication. Authors are responsible for the costs of reprints. An order form, showing costs, is sent to the authors with galley proofs.

Vascular Angiotensin II Receptors in SHR
Ernesto L. Schiffrin, Fernando S. Thomé, Jacques Genest ____ 682

Hemodynamic Characterization of Hypertension Induced by Chronic Intrarenal or Intravenous Infusion of Norepinephrine in Conscious Rats
Jos C.S. Kleinjans, Jos F.M. Smits, Helma van Essen, Carina M. Kasbergen, Harry A.J. Struyker Boudier ____ 689

Blood Pressure, Lanthanum- , and Norepinephrine-Induced Mechanical Response in Thoracic Aortic Tissue
Ismail Laher, Chris Triggle ____ 700

Hypertension-Producing Factor in Serum of Hypertensive Dahl Salt-Sensitive Rats
Yasunobu Hirata, Louis Tobian, Geza Simon, Junichi Iwai ____ 709

CLINICAL STUDIES

Further Evaluation of Saline Infusion for the Diagnosis of Primary Aldosteronism
O. Bryan Holland, Helle Brown, LaVon Kuhnert, Carol Fairchild, Martin Risk, Celso E. Gomez-Sanchez ____ 717

Red Cell Cotransport Activity and Sodium Content in Black Men
Richard E. Ringel, John M. Hamlyn, Juergen Schaeffer, Bruce P. Hamilton, Avinoam A. Kowarski, Mordecai P. Blaustein, Michael A. Berman ____ 724

Effect of Dietary Sodium Reduction on Red Blood Cell Sodium Concentration and Sodium-Lithium Countertransport
Richard Cooper, Maurizio Trevisan, Linda Van Horn, Emmanuel Larbi, Kiang Liu, Seraphim Nanas, Hirotsugu Ueshima, Christopher Sempos, David Ostrow, Jeremiah Stamler ____ 731

Multivariate Analysis of Interrelationships Between Blood Pressure, Sodium, Potassium, Serum Cholesterol, and Protein Intake in Japanese
Masahiro Kihara, Jun Fujikawa, Michiya Ohtaka, Masayuki Mano, Yasuo Nara, Ryoichi Horie, Tokugoro Tsunematsu, Shinya Note, Masaichi Fukase, Yukio Yamori ____ 736

Renal and Systemic Hemodynamics in Sustained Essential Hypertension
Gérard M. London, Michel E. Safar, Jean E. Sassard, Jaime A. Levenson, Alain C. Simon ____ 743

Left Ventricular Mass Reduction During Salt Depletion in Arterial Hypertension
L. Aldo Ferrara, Giovanni de Simone, Fabrizio Pasanisi, Marcello Mancini, Mario Mancini ____ 755

CASE REPORTS

Diagnosis and Treatment of Renin-Secreting Tumors
Dominique Baruch, Pierre Corvol, François Alhenc-Gelas, Marie-Anne Dufloux, Tam T. Guyenne, Jean-Claude Gaux, Alain Raynaud, Jean-Marie Brisset, Jean-Marc Duclos, Joel Menard ____ 760

CLINICAL CONFERENCE

Accelerated Hypertension in a 64-Year-Old White Woman
Gordon S. Stokes ____ 767

LETTER TO THE EDITOR

The Australian Therapeutic Trial in Mild Hypertension
John D. Abernethy ____ 774

BOOK REVIEWS

Hypertension: Physiopathology and Treatment, 2nd Ed.
John D. Swales ____ 777
Norman M. Kaplan ____ 778

Abstracts of the Council for High Blood Pressure Research ____ 779

NEWS FROM THE AMERICAN HEART ASSOCIATION ____ 794A

Volume 6, Number 6, Part 1, November-December 1984

EDITORIAL

Reduction of Dietary Sodium in Western Society
M. Gary Nicholls ____ 795

CLINICAL STUDIES

High Blood Pressure in Older Americans
William R. Harlan, Alan L. Hull, Robert L. Schmouder, J. Richard Landis, Frances A. Larkin, Frances E. Thompson ____ 802

Blood Pressure and Associated Factors in a Rural Kenyan Community
Neil Poulter, Kaytee T. Khaw, Burton E.C. Hopwood, Mutama Mugambi, W. Stanley Peart, Geoffrey Rose, Peter S. Sever ____ 810

Importance of Dietary Salt in the Hemodynamic Adjustment to Weight Reduction in Obese Hypertensive Men
Ove K. Andersson, Björn Fagerberg, Thomas Hedner ____ 814

Adrenergic Activity and Peripheral Hemodynamics in Relation to Sodium Sensitivity in Patients with Essential Hypertension
Marianne I. Koolen, Peter van Brummelen ____ 820

Low Sodium Cotransport in Red Cells with Physiological Internal Sodium Concentration in Essential Hypertension
Alberto Montanari, Emilio Sani, Mauro Canali, Isabella Simoni, Paolo Schianchi, Alberico Borghetti, Almerico Novarini ____ 826

Role of Cardiopulmonary Mechanoreceptors in ADH Release in Normal Humans
Brent Egan, Roger Grekin, Hans Ibsen, Karl Osterziel, Stevo Julius ____ 832

LABORATORY STUDIES

Urinary Excretion of Renin and Its Biochemical Properties in Dogs
Tokihito Yukimura, Katsuyuki Miura, Yohkazu Matsushima, Fumihiko Ikemoto, Kenjiro Yamamoto ____ 837

Production and Characterization of Monoclonal Antibodies to Rat Angiotensinogen
Eric Clauser, Wolfgang Baier-Kustermann, Jacob Bouhnik, Pierre Corvol, Joel Menard, Marco Celio ____ 843

Contribution of Vasopressin and the Sympathetic Nervous System in the Early Phase of High Sodium One-Kidney Renal Hypertension
Carmen Hinojosa, Joseph R. Haywood ____ 848

Cholinergic Stimulation of Vasopressin Release in Spontaneously Hypertensive Rats
Celia D. Sladek, Martha L. Blair ____ 855

Vasopressor Hyperresponsiveness in New Zealand Genetically Hypertensive Rats
Philip G. Baer ____ 861

Is the Hypertensive Rat Really Hyperreactive?
James R. Sutterer, Catherine M. Stoney, Michael Sanfillipo ____ 868

Microvascular Pressure, Flow, and Resistance in Spontaneously Hypertensive Rats
John W. Roy, Harvey N. Mayrovitz ____ 877

Vascular Responses to Serotonin in Steroid Hypertensive Rats
Thomas E. Mecca, R. Clinton Webb ____ 887

Role of Renal Papillae in the Regulation of Sodium Excretion During Acute Elevation of Renal Perfusion Pressure in the Rat
Pai S. Chen, Robert M. Caldwell, Chen H. Hsu ____ 893

Role of Dopamine in the Development of Spontaneous Hypertension
Maarten van den Buuse, Dirk H.G. Versteeg, Wybren de Jong ____ 899

Central Effect of Intravenous Phenylephrine on Baroreflex Control of Renal Nerves
Tsutomu Imaizumi, Scott D. Brunk, Badri N. Gupta, Marc D. Thames ____ 906

Sympathetic Vasoconstriction Sensitive to α_2-Adrenergic Receptor Blockade
Dietmar Elsner, Maythem Saeed, Olaf Sommer, Jürgen Holtz, Eberhard Bassenge ____ 915

Chronic Arterial and Venous Catheterization of Conscious, Unrestrained Rats
Géza Fejes-Tóth, Anikó Náray-Fejes-Tóth, Dieter Ratge, Jürgen C. Frölich ____ 926

CASE REPORT

Angiotensinogen-Producing Hepatocellular Carcinoma
Naoto Ueno, Kaoru Yoshida, Shigehisa Hirose, Hisamitsu Yokoyama, Hideo Uehara, Kazuo Murakami ____ 931

CLINICAL CONFERENCE

Hypertensive Cardiovascular Disease
Edward D. Frohlich ____ 934

NEWS FROM THE AMERICAN HEART ASSOCIATION 940A

INDEX TO VOLUME 6 ____ 941

Hypertension

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

Supplements to HYPERTENSION are published occasionally and may be bound with each volume. The first supplement in a volume begins with page I-1. The second supplement would begin with page II-1. Volume index issues include a separate supplement index whenever supplements have been published with that volume.

NEUROENDOCRINE, VASCULAR, AND RENAL ELEMENTS OF HYPERTENSION

Supplement I, March-April 1984, Volume 6, Number 2

PREFACE

Neuroendocrine, Vascular, and Renal Elements of Hypertension
Allen W. Cowley, Jr. ____ iii

CENTRAL AND AUTONOMIC NERVOUS SYSTEMS

Central and Peripheral Indices of Sympathetic Activity after Blood Pressure Lowering with Enalapril (MK-421) or Hydralazine in Normotensive Rats
Osvaldo Kohlmann, Jr., Margaret Bresnahan, Haralambos Gavras ____ I-1

Synthesis and Characterization of a Radioiodinated Photoaffinity Probe for the Alpha$_1$-Adrenergic Receptor
Christine E. Seidman, Hans-Jurgen Hess, Charles J. Homcy, Robert M. Graham ____ I-7

Postsynaptic Alpha$_2$-Adrenergic Receptor-Mediated Vasoconstriction in SHR Tail Arteries In Vitro
Peter E. Hicks, Iain C. Medgett, Salomon Z. Langer ____ I-12

Regulation of Alpha$_1$-Adrenergic Receptor-Coupled Calcium Flux in Cultured Vascular Smooth Muscle Cells
Wilson S. Colucci, Tommy A. Brock, Michael A. Gimbrone, Jr., R. Wayne Alexander ____ I-19

Separation of Peripheral Dopamine Receptors by a Selective DA$_1$ Antagonist, SCH 23390
Leon I. Goldberg, Dana Glock, Jai D. Kohli, Allen Barnett ____ I-25

Decreased Isoproterenol-Induced "Down"-Regulation of Beta-Adrenergic Receptors in the Myocardium of SHR
Constantinos J. Limas, Catherine Limas ____ I-31

Propylbutyldopamine. Mechanism of Blood Pressure Lowering in Hypertensive Patients
Addison A. Taylor, William H. Fennell, Christopher O. Ruud, James L. Pool, Edward B. Nelson, James Z. Ginos, Jerry R. Mitchell ____ I-40

Cerebrospinal Fluid Kinins and Cardiovascular Function: Effects of Cerebroventricular Melittin
G. Roger Thomas, Harold Thibodeaux, Harry S. Margolius, Phillip J. Privitera ____ I-46

Regional Sources of Free and Sulfoconjugated Catecholamines in Hypertension
Otto Kuchel, Nguyen T. Buu, Paul Roy, Pavel Hamet, Pierre Larochelle, Jacques Genest ____ I-51

VASCULAR SMOOTH MUSCLE AND STRUCTURAL DERANGEMENTS

Smooth Muscle Proliferation in Hypertension. State-of-the-Art Lecture
Stephen M. Schwartz ____ I-56

Blood Pressure Lowering Diminishes Age-Related Changes in the Rat Aortic Intima
Christian C. Haudenschild, Aram V. Chobanian ____ I-62

Outcomes to Middle Cerebral Artery Occlusion in Hypertensive and Normotensive Rats
Peter Coyle ____ I-69

Evidence That Disruption of the Blood-Brain Barrier Precedes Reduction in Cerebral Blood Flow in Hypertensive Encephalopathy
Kinya Tamaki, Seizo Sadoshima, Gary L. Baumbach, Constantino Iadecola, Donald J. Reis, Donald D. Heistad ____ I-75

Effect of Ouabain on Arteriolar Responses to Norepinephrine in Chronic, Benign, Volume-Expanded Hypertension
Henry W. Overbeck ____ I-82

Functional Evidence for Increased Sodium Permeability in Aortas from DOCA Hypertensive Rats
Robert S. Moreland, Fred S. Lamb, R. Clinton Webb, David F. Bohr ____ I-88

ENDOCRINE FACTORS

Complementary DNA Sequences of Renin. State-of-the-Art Review
Kazuo Murakami, Shigehisa Hirose, Hitoshi Miyazaki, Takashi Imai, Hitoshi Hori, Takashi Hayashi, Ryoichiro Kageyama, Hiroaki Ohkubo, Shigetada Nakanishi ____ I-95

Continued on next page

Contents *(continued)*

Purification and Characterization of One-Chain and Two-Chain Renins from Mouse Submandibular Gland
Richard E. Pratt, Victor J. Dzau ____ I-101

Saralasin Dilates Arterioles in SHR but Not WKY Rats
David E. Longnecker, Marcel E. Durieux, Kent R. Donovan, Edward D. Miller, Jr., Michael J. Peach ____ I-106

Statine-Containing Renin Inhibitor. Dissociation of Blood Pressure Lowering and Renin Inhibition in Sodium-Deficient Dogs
Edward H. Blaine, Terry W. Schorn, Joshua Boger ____ I-111

Dopamine Modulates Sodium-Dependent Aldosterone Responses to Angiotensin II in Humans
Charles R. Drake, Jr., Robert M. Carey ____ I-119

Effect of Changes in Sodium or Potassium Balance, and Nephrectomy, on Adrenal Renin and Aldosterone Concentrations
Yutaka Doi, Keichiro Atarashi, Roberto Franco-Saenz, Patrick J. Mulrow ____ I-124

Distribution of Immunoreactive Angiotensin II, Angiotensin I, Angiotensinogen, and Renin in the Central Nervous System of Intact and Nephrectomized Rats
Dennis P. Healy, Morton P. Printz ____ I-130

A New Form of Inactive Renin in Rat Brain. A Latent Renin
Taisuke Inagaki, Tadashi Inagami ____ I-137

Atrial Natriuretic Factor Inhibits Angiotensin-, Norepinephrine-, and Potassium-Induced Vascular Contractility
Hollis D. Kleinert, Thomas Maack, Steven A. Atlas, Andrzej Januszewicz, Jean E. Sealey, John H. Laragh ____ I-143

Dahl S Rats Have Increased Natriuretic Factor in Atria but Are Markedly Hyporesponsive to It
Yasunobu Hirata, Mukul Ganguli, Louis Tobian, Junichi Iwai ____ I-148

Effects of a Specific Inhibitor of the Vascular Action of Vasopressin in Humans
Haralambos Gavras, Artur B. Ribeiro, Osvaldo Kohlmann, Manuel Saragoça, Rogerio A. Mulinari, Osvaldo Ramos, Irene Gavras ____ I-156

Defective Synthesis of Vasodilator Prostaglandins in the Spontaneously Hypertensive Rat
André Martineau, Michel Robillard, Pierre Falardeau ____ I-161

Free Calcium Concentration in Platelets Closely Relates to Blood Pressure in Normal and Essentially Hypertensive Subjects
Paul Erne, Ernst Bürgisser, Peter Bolli, BaoHua Ji, Fritz R. Bühler ____ I-166

RENAL FUNCTION

Potassium Protects Against Lesions of the Renal Tubules, Arteries, and Glomeruli and Nephron Loss in Salt-Loaded Hypertensive Dahl S Rats
Louis Tobian, Deborah MacNeill, Mary Ann Johnson, Mukul C. Ganguli, Junichi Iwai ____ I-170

Malignant Hypertensive Crisis Induced by Chronic Intrarenal Norepinephrine Infusion
Thomas E. Lohmeier, Larry J. Tillman, Robert G. Carroll, Alison J. Brown, Arthur C. Guyton ____ I-177

Role of Renal Hemodynamics and Arterial Pressure in Aldosterone "Escape"
John E. Hall, Joey P. Granger, Manis J. Smith, Jr., Andre J. Premen ____ I-183

Mechanism of Deterioration in Renal Function in Patients with Renovascular Hypertension Treated with Enalapril
Walter Bender, Norman La France, W. Gordon Walker ____ I-193

SPECIAL REPORTS

Effect of Stepped Care Treatment on the Incidence of Myocardial Infarction and Angina Pectoris. 5-Year Findings of the Hypertension Detection and Follow-Up Program
Hypertension Detection and Follow-Up Program Cooperative Group ____ I-198

Report from the Hypertension and Kidney Diseases Branch of the National Heart, Lung, and Blood Institute
Michael J. Horan ____ I-207

A History of the Council for High Blood Pressure Research. Past Imperfect, Present Indicative, and Future Perfect
Irvine H. Page ____ I-208

CIBA AWARD FOR HYPERTENSION RESEARCH ____ I-211

CONTENTS TO VOLUME 6 SUPPLEMENTS

CENTRAL α-ADRENERGIC BLOOD PRESSURE REGULATING MECHANISMS

Supplement II, September-October 1984, Volume 6, Number 5

FUNDAMENTAL PRINCIPLES

Molecular Biology of Catecholamine Neurons: Similar Gene Hypothesis
Tong H. Joh, E. Edward Baetge, Donald J. Reis ____ II-1

Brain Stem Catecholamine Mechanisms in Tonic and Reflex Control of Blood Pressure
Donald J. Reis, Antonio R. Granata, Tong H. Joh, Christopher A. Ross, David A. Ruggiero, Dong H. Park ____ II-7

Bulbospinal Serotonin Pressor Pathways and Hypotensive Action of Methyldopa in the Rat
John P. Chalmers, Jane B. Minson, Vernon Choy ____ II-16

Molecular Biology of Adrenergic Receptors in the Rat and Frog Central Nervous System
Marc G. Caron, L.M. Fredrik Leeb-Lundberg, Catherine D. Strader, Kenneth E.J. Dickinson, Virginia M. Pickel, Tong H. Joh, Robert J. Lefkowitz ____ II-22

PHARMACOLOGY

The Hypotensive Activity and Side Effects of Methyldopa, Clonidine, and Guanfacine
Pieter A. van Zwieten, Martin J.M.C. Thoolen, Pieter B.M.W.M. Timmermans ____ II-28

Changes in Brain α-Adrenergic Receptors After α-Methyldopa Administration to Spontaneously Hypertensive Rats
Curt R. Freed, Ching H. Wang, David C. U'Prichard ____ II-34

Effects of α-Methyldopa Metabolites on Amine Transmitters and Adrenergic Receptors in Rat Brain
William J. Louis, Elizabeth Conway, Roger Summers, Philip Beart, Bevyn Jarrott ____ II-40

Antihypertensive Metabolites of α-Methyldopa
David Robertson, Che-Se Tung, Michael R. Goldberg, Alan S. Hollister, John F. Gerkens, John A. Oates ____ II-45

New Centrally Acting Antihypertensive Drugs Related to Methyldopa and Clonidine
Charles S. Sweet ____ II-51

CLINICAL PHARMACOLOGY

Effect of Centrally Acting α-Adrenergic Agonists on Sympathetic Nervous System Function in Humans
Morris J. Brown, Deborah Hartland, Michael B. Murphy, Alan D. Struthers ____ II-57

Central and Peripheral Autonomic Mechanisms Involved in the Circulatory Actions of Methyldopa
Paul I. Korner, Geoffrey A. Head, Alex Bobik, Emilio Badoer, Judith A. Aberdeen ____ II-63

Withdrawal Reactions Following Cessation of Central α-Adrenergic Receptor Agonists
John L. Reid, Brian C. Campbell, Carlene A. Hamilton ____ II-71

Hemodynamic and Cardiac Effects of Centrally Acting Antihypertensive Drugs
Edward D. Frohlich, Franz H. Messerli, Barbara L. Pegram, Merrill B. Kardon ____ II-76

Fifteen-Year Survival of Patients Beginning Treatment with Methyldopa Between 1962 and 1966
Colin T. Dollery, Kerstin Hartley, Pauline F. Bulpitt, Margot Daymond, Christopher J. Bulpitt ____ II-82

In Summary: Satellite Symposium on Central α-Adrenergic Blood Pressure Regulating Mechanisms
William B. Abrams ____ II-87

CONTENTS TO VOLUME 6 SUPPLEMENTS

PATHOPHYSIOLOGY AND CLINICAL IMPLICATIONS OF EARLY STRUCTURAL CHANGES

Supplement III, November-December 1984, Volume 6, Number 6

PREFACE

Pathophysiology and Clinical Implications of Early Structural Changes
Björn Folkow ____ III-iii

Brief Historical Background and Principal Nature of Process
Björn Folkow ____ III-1

FACTORS DETERMINING STRUCTURAL CARDIOVASCULAR CHANGES

Extrinsic Factors

Functional Dynamics of the Left Ventricle in Hypertensive Hypertrophy and Failure
Bodo E. Strauer ____ III-4

Determinants of Vascular Hemodynamic Characteristics
Michael J. Mulvany ____ III-13

Trophic Effects of Peripheral Adrenergic Nerves on Vascular Structure
Rosemary D. Bevan ____ III-19

Humoral Trophic Influence on Cardiovascular Structural Changes in Hypertension
Yukio Yamori, Takehiro Igawa, Motoki Tagami, Toshimi Kanbe, Yasuo Nara, Masahiro Kihara, Ryoichi Horie ____ III-27

Intrinsic Factors

Hypertension as a Vascular Response to Injury
Stephen M. Schwartz ____ III-33

Different Kinds of Structural Changes

Myocardial Cell Hypertrophy or Hyperplasia
Suzanne Oparil, Sanford P. Bishop, Fred J. Clubb, Jr. ____ III-38

Synthesis of Collagen in Cardiac and Vascular Walls
James P. Gilligan, Sydney Spector ____ III-44

REGIONAL STRUCTURAL DIFFERENCES AND FUNCTIONAL CONSEQUENCES

Myocardial Structural Adaptation

The Inhomogeneity and Appropriateness of the Myocardial Response to Stress
Norman R. Alpert, Louis A. Mulieri ____ III-50

Functional Consequences of Structural Adaptation of the Heart in Hypertension
Margareta I.L. Nordlander ____ III-58

Vascular Structural Adaptation

Different Types of Smooth Muscle Hypertrophy
Börje Johansson ____ III-64

Structural Changes in Resistance and Capacitance Vessels in Borderline Hypertension
Allyn L. Mark ____ III-69

The Coronary Circulation in Hypertensive Heart Disease
Bodo E. Strauer ____ III-74

Cerebral Vascular Bed in Hypertension and Consequences for the Brain
Barbro B. Johansson ____ III-81

Intrarenal Arteries in Rats with Early Two-Kidney, One Clip Hypertension
Udo Helmchen, Rainer M. Bohle, Ursula Kneissler, Hermann J. Groene ____ III-87

Structural Cardiovascular Adaptation: Effects on the Barostats

Structural Cardiovascular Adaptation and the Consequences for Baroreflexes
Alberto Zanchetti, Giuseppe Mancia ____ III-93

Consequences of Structural Renovascular Changes for Renal Barostat Function
Björn Folkow, Gunnar Göthberg ____ III-100

CARDIOVASCULAR STRUCTURAL CHANGES IN HUMAN PRIMARY HYPERTENSION

Structural Adaptation in Borderline Hypertension
Ramon Sivertsson ____ III-103

Left Ventricular Function in Early Primary Hypertension
John Wikstrand ____ III-108

Structural Changes of Large Arteries in Sustained Essential Hypertension
Michel E. Safar, Alain Ch. Simon, Jaime A. Levenson ____ III-117

Circulatory Changes in Muscle and Skin Arteries in Primary Hypertension
Denis L. Clement, Daniel Duprez ____ III-122

Vascular, Volume, and Cardiac Response to Normal and Hypertensive Pregnancy
Stephen N. Hunyor ____ III-128

REGRESSION OF STRUCTURAL CARDIOVASCULAR CHANGES BY ANTIHYPERTENSIVE THERAPY

Regression of Structural Cardiovascular Changes by Antihypertensive Therapy
Wolfgang Motz, Bodo E. Strauer ____ III-133

Reversal of Cardiac Hypertrophy in Humans
Robert C. Tarazi, Fetnat M. Fouad ____ III-140

Continued on next page

Regression of Structural Cardiovascular Changes by Antihypertensive Therapy
Lennart Hansson, Ramon Sivertsson ____ III-147

Regression of Cardiovascular Structural Changes by Antihypertensive Treatment
Bruno Trimarco, John Wikstrand ____ III-150

Regression of Retinal Vascular Changes by Antihypertensive Therapy
Klaus Dietrich Bock ____ III-158

Hemodynamic Effects of Antihypertensive Drugs
J. David Spence ____ III-163

EFFECTS OF INTERVENTION ON LONG-TERM PROGNOSIS

The Main End Points in Human Hypertension
Lars Wilhelmsen ____ III-169

Effects of Antihypertensive Treatment on Prognosis
Göran Berglund ____ III-174

Effects of Various Drug Regimens
William A. Littler ____ III-179

Early Versus Late Onset of Therapy
Björn Folkow ____ III-185
